DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 06/27/2006 has been entered.

2. The Amendment filed by Applicant on 06/27/06 has been entered.

Response to Amendment/Arguments

3. Applicant's amendment and arguments filed on 06/27/06 have been fully considered and they are found persuasive.

4. The rejection of claims 1-13 under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Pellegatti et al., EP 0 640 649 B1 (hereinafter "Pellegatti") is withdrawn.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pellegatti et al., EP 0 640 649 B1 (hereinafter "Pellegatti") in combination with Buehler et al., U.S. Patent No. 6,048,942 (hereinafter "Buehler"). Pellegatti discloses a polyolefin composition comprising (a) 30-60%

propylene homopolymer, (b) 14-30% copolymers of propylene with ethylene, (c) 10-25% copolymer of ethylene/C₄-C₁₀ olefins and (d) 5-45% filler. See Pellegatti, page 2, lines 33-45. Pellegatti does not teach the flexural modulus limitation. Buehler teaches in analogous art a thermoplastic olefin with a flexural modulus of less than 700 Mpa. See Buehler, Example 3. In view of Buehler, one having an ordinary skill in the art would be motivated to modify Pellegatti by using masterbatch composition with a flexural modulus of less than 700 Mpa. Such modification would be obvious because one would expect that the use of masterbatch compositions as taught by Pellegatti would be similarly useful and applicable to the polymers taught in Buehler.
